

SRA 5.0

AUTOMATIC SAW WITH DOUBLE CUT SYSTEM (DCS)

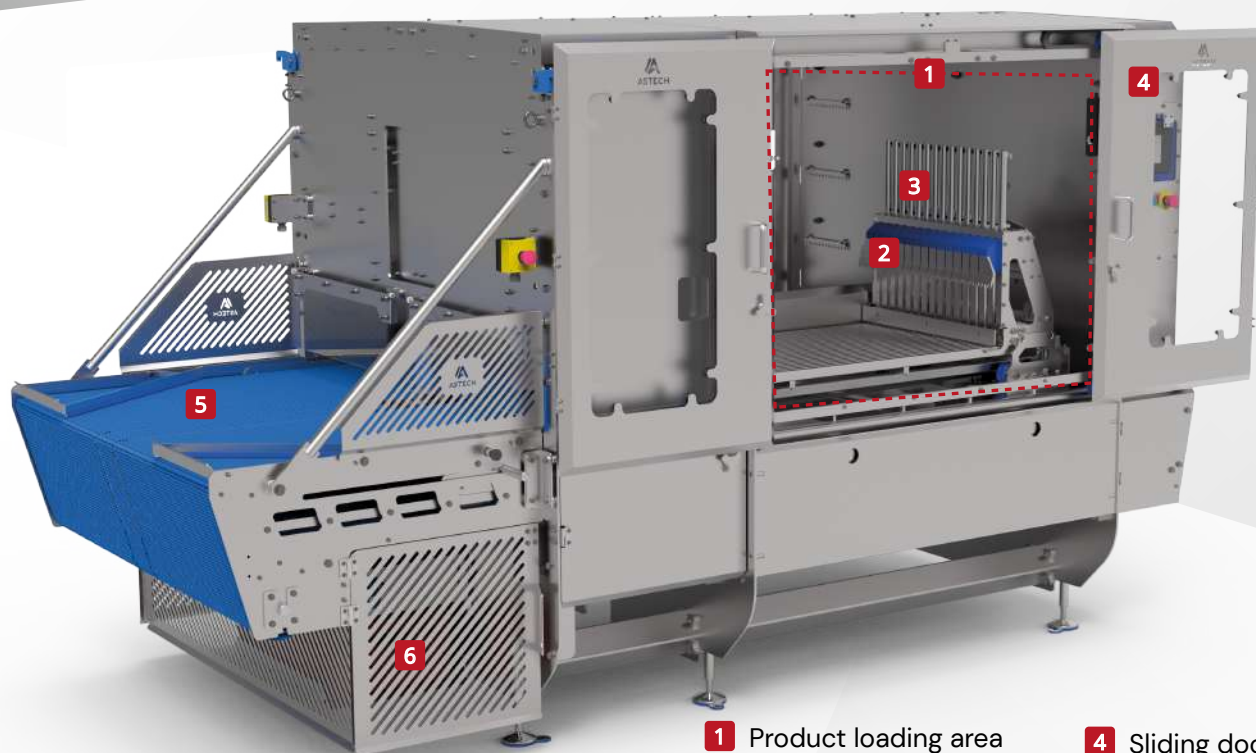

Automatic saw for high production, with double cut system for fresh* and frozen products, with and without bone. Compact and robust machine, offering high output per operator, precision in cut thickness, and, above all, maximum safety during use.

**Following previous study.*

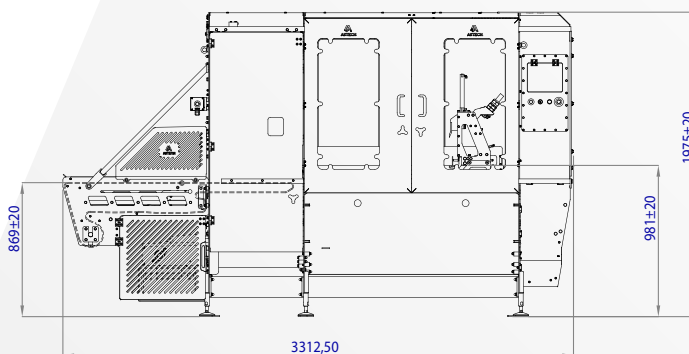

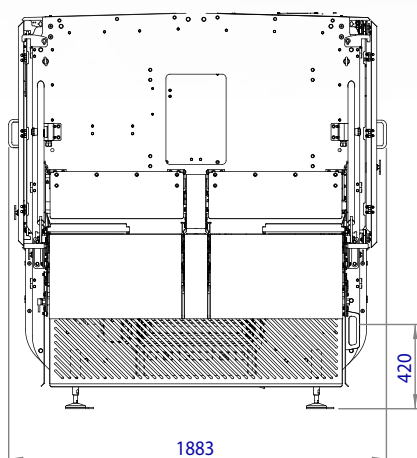

Advantatges

- ▶ Fully adjustable cutting speed with a servomotor.
- ▶ Hygienic design for easy cleaning.
- ▶ Completely safe working process (fully enclosed machine).
- ▶ Optional automatic door opening and closing.
- ▶ Bandsaw Double Cutting System.
- ▶ The product can be loaded from either side, but not simultaneously from both sides.
- ▶ Automatic sawdust extraction system.
- ▶ Versatile program easy to operate with the option of storing up to 50 different recipes.

- 1** Product loading area
- 2** Product loading trolley
- 3** Gripping clamps
- 4** Sliding doors
- 5** Outfit conveyor belt
- 6** Sawdust collection

Technical information

Machine dimensions (L x W x H)
3315 (3510) x 1900 (3170) x 1975 mm

Loading area dimensions (L x W x H)
1000 x 650 x 260 mm

Maximum cutting thickness
260 mm

Compressed air	Saw blade	Power
Pressure 6 bar	2680 x 35 mm	10 kW
(10,7l/compl. cycle)
