

Screw Conveyors

Engineering

Engineering is done in house, so your wishes and requirements are directed straight to the responsible person. In this way we offer short communication lines, resulting in less possible errors.

Product range

Besides our standard product range, we offer most customer made executions. This can vary from mild steel to stainless steel or a combination. From 3mm upto 20mm flighting. This all in short communication with our engineering department

Production

During production we have a constant quality check. Any possible errors or miscommunication between engineering and workfloor can be eliminated on a quick and efficient manner minimizing any possible delay.

Quality control

All conveyors are checked before shipment to secure you receiving a quality product without any surprises.

Transport

We arrange transport from our factory to your address. Our experience with transporting screw conveyors allows you to spend your valuable time on your core-business.

Installation (optional)

If required we can do the installation on site. We have the right people in our organization to execute the job. Years of experience make them the experts!

Due to ongoing product improvements, data shown here is subject to change without notice.
